The application has been amended as follows:

Regarding **claim 3**:

Page 15 line 20, the recitation "the drain of the second output transistor" has been changed to --the drain of the first output transistor--;

Page 15 line 21, the recitation "and to the gate of the first output transistor" has been deleted.

Regarding **claim 10**:

2. The following is an examiner's statement of reasons for allowance: Chien (6,977,531) discloses a high frequency peak detector comprising an operational amplifier 102, a transistor T1 and a capacitor C4. Chien, however, fails to disclose or render obvious that the operational amplifier has a second inverting input coupled to

receive a common mode voltage of the high frequency signal and a non-inverting input coupled to the output of the operational amplifier as claimed. In addition, the gate of the transistor T1 is not operably coupled to the output of the operational amplifier 102 as claimed (the transistor T1 is included within the operational amplifier 102). None of other cited prior art cure the above deficiencies in Chien.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
